

## Research on **movement** and **coordination difficulties**

Do you have difficulties with handwriting?  
Do you find it hard to play ball sports?  
Have you ever been diagnosed with  
Developmental Coordination Disorder or “Dyspraxia”?

If so, you might be interested to take part in our research. We are carrying out a wide range of studies including: analysis of walking patterns; assessment of handwriting speed; and aspects of physical fitness.

**If you would like to participate in our studies and/or would like more information, please complete and return this form.**
